## Profile

Third-year engineering student at KTH with a passion for programming. Completed 10+ relevant projects, gaining expertise in Python, and SQL. Founded multiple software businesses, developing strong skills in software development and project management. Eager to apply my technical knowledge and enthusiasm for machine learning as a Machine Learning Engineer.

## Education

### 2018 – 2021 — Rudbeck

Tech Programme – Media and Information Technology

### 2021 – 2026 — KTH Royal Institute of Technology

BSc in Media Technology and Engineering

MSc in Computer Science – Data Science specialization

## Employment

### 2017 – 2021 — Swim Coach (Turebergs Simklubb)

Experienced Swim Coach skilled in fostering teamwork, adapting coaching techniques to suit individual styles, and guiding athletes towards success.

### 2022 – 2023 — TA, Programming & Scientific Computing (KTH)

Proactive Teacher Assistant skilled in guiding students through mathematical programming challenges. Proficient in Python, Numpy, and applied mathematical and physical programming. Committed to fostering an engaging learning environment and supporting both students and instructors, as well as the other course assistants.

## Technical skills

- |          |                    |
|----------|--------------------|
| ▪ Python | ▪ Machine Learning |
| ▪ SQL    | ▪ Data Science     |
| ▪ C++    | ▪ Git              |
| ▪ C#     | ▪ Web Development  |
